Mexican Tortilla Pinwheels

INGREDIENTS!

Large flour tortillas
1 tub of cream cheese
2 tbsp sour cream
1 tsp taco seasoning
1/4 cup finely chopped red capsicum
2 – 3 tbsp finely chopped fresh coriander
1/4 cup shredded cheddar cheese
1/4 cup salsa

LET'S COOK!

Step 1

Mix together the cream cheese, sour cream and taco seasoning until smooth.

Step 2

Stir in the remaining ingredients

Step 3

Spread the cream cheese mixture evenly between the 5 flour tortillas, making sure to leave about a half an inch along the edges of the tortillas without the mixture.

Step 4

When you're ready to serve them, cut the tortillas into 3 cm

TRAVELLING WATER COLOURS

LAB KIT!

Food colouring
Salt
PVA Glue
Pipette

LET'S EXPERIMENT!

Step 1

Create 3-4 colour mixtures with water and food colouring in a cup.

Step 2

Place a piece of paper on a tray.
Create a design on the paper in white glue lines. The lines should connect to make this work the best.

Step 3

Pour salt over the glue design until covered.
Pour off the extra salt.

Step 4

Drip water colours on lines with a pipette
and watch the colour travel.

The Science Behind It

Salt absorbs or soaks up the water through a chemical action. Salt is hygroscopic which means that it can absorb both liquid water and water vapor in the air.

CLOTHES PEG PUPPETS

credit easypeasyandfun.com

ART KIT!

Template
Markers
Paper
Printer
Pegs

LET'S CREATE!

Step 1

Print and cut out the puppet

Step 2

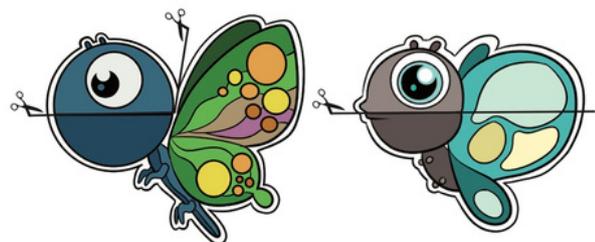

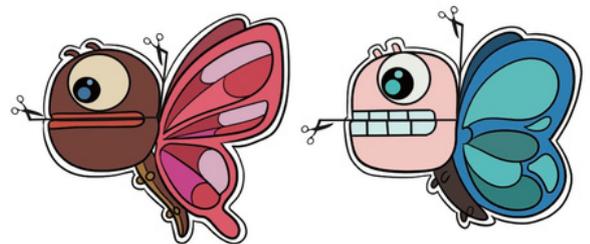

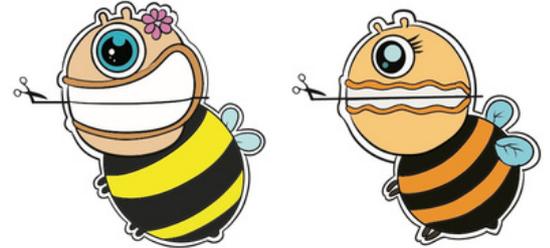

Cut along the mouth line

Step 3

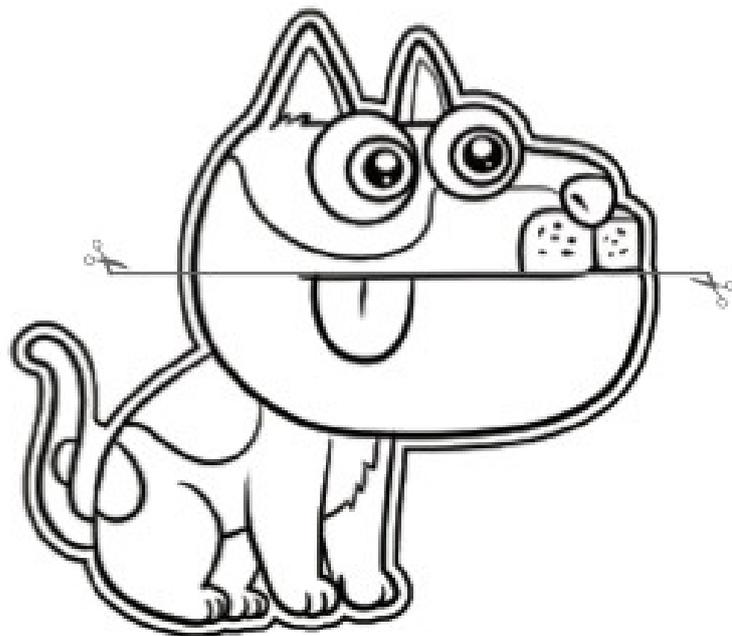

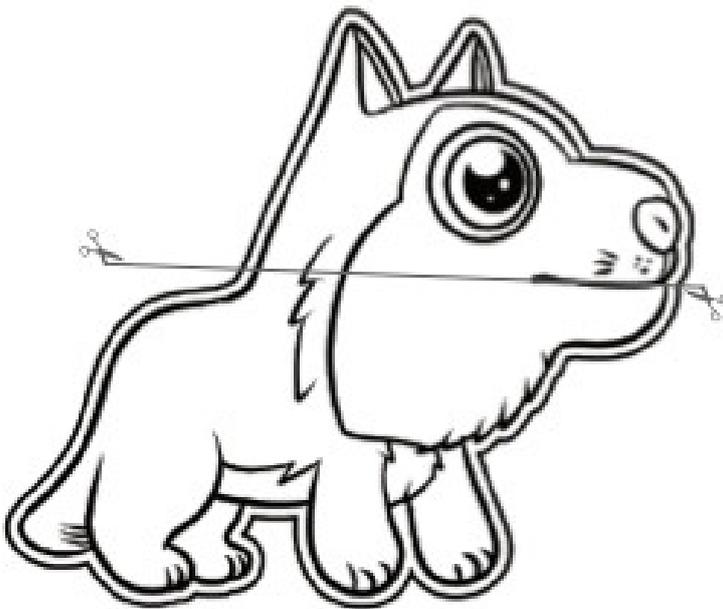

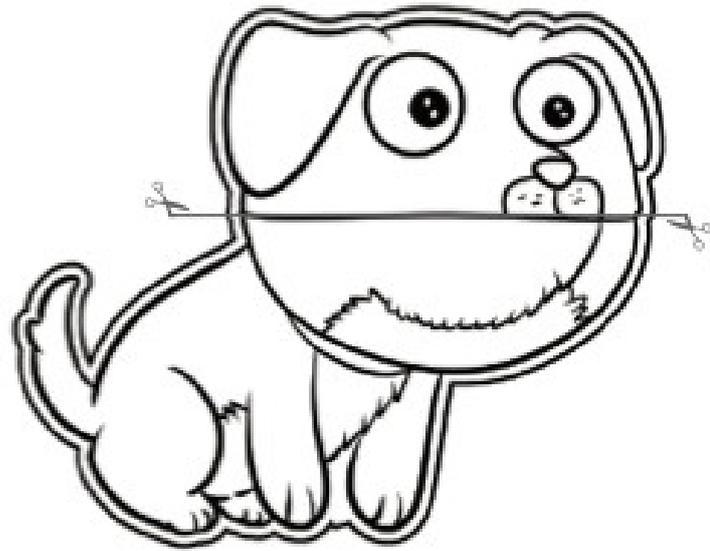

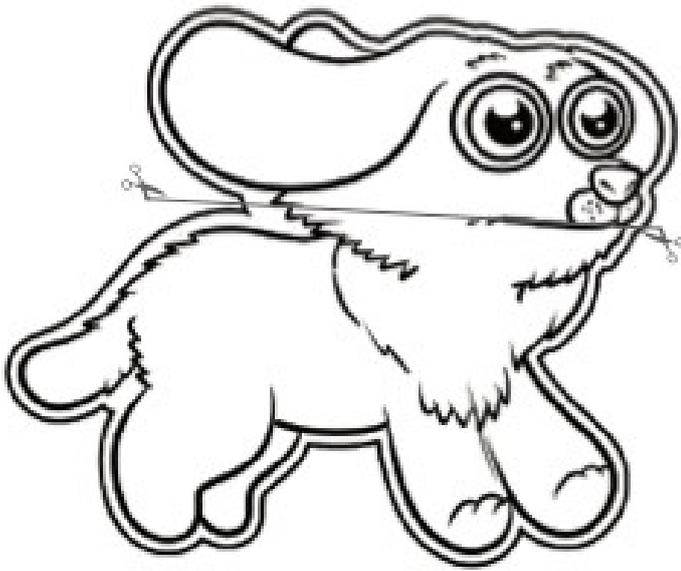

Grab a clothes peg and glue the top part of the puppet to the top part of the peg gripping area

Step 4

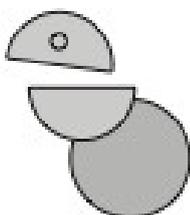

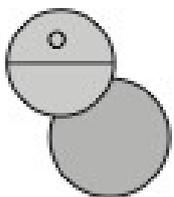

Add the bottom part of the puppet to the bottom part of the peg

Dogs Clothespin Puppets

Cut out the puppet. Cut along the mouth line.

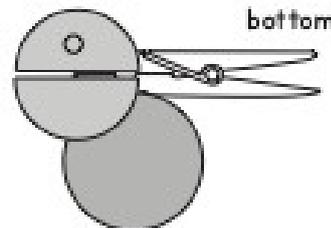

Grab a clothespin.

Glue the top part of the head to the top part of the clothespin gripping area.

And the bottom part to the bottom.

EMOTIONS CUP

ART KIT!

- 2 paper cups
- Black permanent marker
- Colourful permanent marker
- Craft knife (adults only)
- Pencil

Step 1

Take one of the paper cups and draw an octopus on it. You can sketch it with a pencil first so you can "fix" things if necessary. The head / body of the octopus needs to be wide and large enough (taking a greater portion of the cup). Once you are happy with your octopus craft design draw it with a black permanent marker. Colour the octopus.

Step 2

Adult only: With a craft knife cut out a rectangle in the head region (mark it with a pencil to make it easier).

Step 3

Now that you have one cup with the hole, take the other cup and push it inside the one with the hole (octopus on top). Take a regular pencil and trace the rectangle (through the rectangle hole) to make a rectangle outline on the cup inside. Rotate the cup a bit, moving the square outside of the rectangle and draw another rectangle outline. Repeat until you reach the end.

Step 4

Take the cup out. Draw different facial expressions inside the rectangle outlines. Happy, angry, confused, silly, sad, whatever you like.

Step 5

Colour around the faces (and over the edges of the rectangles) with the same colour as you did the octopus body

Step 6

Let the colour dry for a bit to avoid any potential smudges (it shouldn't take long). Place the cup with the octopus body on top of the cup with faces.

Step 8

Rotate the paper cups and have fun watching this paper cup octopus craft change it's face.
